

360° solution

The MAUSER® SM LP (Light Protect) IBC

is equipped with a special light-impermeable bottle. The material is a mixture of polyethylene and an additive which protects the filling goods from UV and visible light, even in geometrically complex areas like nearby the discharge valve and the top filling opening. Compared to composite IBCs with a full metal casing, this is a decisive advantage.

Unlike composite IBCs providing light protection through black coloured bottles, the white coloured bottle of the MAUSER® SM LP reflects the sunlight and therefore will limit temperature levels inside whereas those coloured black heat up much more. This is of particular significance because many light-sensitive filling goods also tend to react chemically at such elevated temperatures.

MAUSER® SM LP Better protection from light
